Taking a subway late can lead to interesting places or be a meeting place for mysterious people.. I must say that it's probably one of the rare casual adventure games without a precise villain.. Hina, the keeper of the place, kidnaps your dog, only for you to help these ghosts to find peace by changing the outcomes of the events tormenting them: a gone too soon journalist, a dam worker left behind and a falsely accused of witchcraft young woman.. If you want to find the latter, it's in the bonus chapter, set after the main story.

I liked being sent in time and save the life of those who shouldn't have died, tormenting souls for eternity as they're regretting their choices (but again, the zookeeper felt guilty as he was a genuine man that did everything he could but it wasn't enough, I'm pretty sure that given the storyline, you'll be agreeing that he shouldn't have be in this limbo).. Hina, the keeper, is a kind spirit, your dog is just kidnapped for making sure that you'll help her and the ghosts, lamenting themselves and feeling responsible for the death of others (though the zookeeper is the only one that wasn't driven by selfish reasons and could have save the journalist if only these keys weren't stolen).. In fact, the enemies are mainly in these events and are merely humans, none being of supernatural nature.. Part of a series, this continuation is on par with the others A bit on the simplistic side, with some puzzles thrown in with the usual hidden object games, if you're intermediate and above, this will be a quick game.. I'm rarely negative for that aspect, however, here, I feel that I should perhaps warn you about some puzzles being long and kinda frustrating or that some hidden objects scenes are just annoying.. Will you succeed, or is this the end of the line? Find out in this thrilling Hidden Object game! This is a special Collector's Edition release full of exclusive extras you won't find in the standard version.
